**THE EFFECT OF TOURISM ATTRACTION, SERVICE QUALITY AND
PRICE ON THE TOURIST INTEREST TO VISIT IN TOURISM VILLAGES
IN THE BALKONDES BOROBUDUR AREA**

ABSTRACT

This study aims to determine the effect of tourist attraction, service quality, and price on tourist interest in visiting tourism villages in the Balkondes Borobudur area. This study uses a quantitative approach. The primary data used in this study were obtained from 100 tourist respondents as a sample and selected based on the convenience sampling method. The data that has been collected was analyzed based on multiple linear regression analysis using SPSS. The results showed that tourist attraction did not affect the tourist interest to visit, while the service quality and price had a positive and significant effect on the tourist interest to visit in the tourist village of the Balkondes Borobudur area. The results of the study provide theoretical implications as a reference for further researchers and provide managerial implications for tourism village managers to implement health protocol-based and CHSE-certified services and offer appropriate promotional prices to increase tourist interest, especially in the new normal era during the Covid-19 pandemic.
