

## **ABSTRAK**

Penelitian ini bertujuan untuk mengetahui hubungan antara kecanduan game *mobile legends* dengan kualitas tidur pada mahasiswa di Yogyakarta. Hipotesis yang diajukan adalah ada hubungan negatif antara kecanduan game *mobile legends* dengan kualitas tidur pada mahasiswa di Yogyakarta. Subjek penelitian ini berjumlah 120 mahasiswa. Pengambilan subjek penelitian menggunakan teknik *purposive sampling* dengan karakteristik mahasiswa yang berkuliah di Yogyakarta serta memainkan game *mobile legends*. Metode pengumpulan data menggunakan skala kecanduan game *mobile legends* dan kualitas tidur yang disusun oleh peneliti. Teknik analisis data menggunakan analisis korelasi product moment. Berdasarkan hasil analisis data, diperoleh koefisien korelasi ( $r_{xy}$ ) = -0,764 dengan  $p = 0,000$  ( $p < 0,050$ ). Berarti ada hubungan yang negatif antara kecanduan game *mobile legends* dengan kualitas tidur pada mahasiswa di Yogyakarta. Hal ini menunjukkan hipotesis yang diajukan diterima. Koefisien determinan ( $R^2$ ) yang diperoleh sebesar 0,583 menunjukkan bahwa variabel kecanduan game *mobile legends* memiliki kontribusi sebesar 58,3% terhadap variabel kualitas tidur dan sisanya 41,7% dipengaruhi oleh variabel-variabel lain.

*Kata kunci : kecanduan game, kualitas tidur, mobile legends*

## **ABSTRACT**

*This research aimed to indicate the correlation between mobile legends game addiction and sleep quality in students Yogyakarta. The hypothesis proposed is that there is a negative correlation between mobile legends game addiction and sleep quality on students in Yogyakarta. The subjects of this research were 120 students. Research subjects were taken using a purposive sampling technique with the characteristics of active students in Yogyakarta and playing mobile legends game. The data collection method uses a scale of mobile legends game addiction and sleep quality compiled by researchers. The data analysis technique uses product-moment correlation analysis. Based on the results of the data analysis, the correlation coefficient ( $r_{xy}$ ) = -0,764 with  $p = 0.000$  ( $p < 0.050$ ) was obtained. This means that there is a negative relationship between mobile legends game addiction and sleep quality in students Yogyakarta. This shows that the proposed hypothesis is accepted. The coefficient of determination ( $R^2$ ) obtained is 0.583 indicating that mobile legends game addiction variable has a contribution of 58,3% to the sleep quality variable and the remaining 41,7% is influenced by other variables.*

*Keywords : game addiction, sleep quality, mobile legends*
