

## **Abstrak**

Pernikahan yang Bahagia adalah harapan dan tujuan setiap pasangan yang telah menikah. Dukungan sosial suami diharapkan berpengaruh penting dalam kepuasan pernikahan sehingga tercipta pernikahan yang Bahagia. Penelitian ini bertujuan untuk mengetahui hubungan antara dukungan sosial suami dengan kepuasan pernikahan pada perawat Wanita dan berdomisili di Jakarta Barat. Subjek penelitian berjumlah 120 orang dengan metode pemilihan subjek yaitu purposive sampling. Metode pengambilan data dalam penelitian ini menggunakan dua skala, yaitu skala kepuasan perkawinan dan skala dukungan sosial suami. Teknik analisis data yang digunakan adalah korelasi product moment dari Karl Pearson. Berdasarkan hasil analisis diperoleh koefisien korelasi (R) sebesar 0.512 dengan  $p = 0.000$  ( $p < 0.050$ ) dan dari hasil analisis data tersebut juga menunjukkan nilai koefisien determinasi ( $R^2$ ) 0.262 yang menunjukkan bahwa variable dukungan sosial suami berkontribusi 26.2% terhadap kepuasan pernikahan. Hasil tersebut menunjukkan bahwa terdapat hubungan positif antara kepuasan pernikahan dengan dukungan sosial suami pada perawat Wanita yang sudah menikah dan berdomisil di Jakarta Barat.

**Kata Kunci : Kepuasan Perkawinan, Dukungan Sosial Suami, perawat wanita**

### **Abstract**

*A happy marriage is a hope and goal every married couple. Husband's support is expected to have an important effect on marital satisfaction that created a happy marriage. This research intend to understand a relation between husband's supportwith marital satisfaction in women nurses and living in West Jakarta. Research subjects amounted to 120 peoples and subjects selection method is purposive sampling. There were two scales used for data collection, which were scale of marital satisfaction and scale of husband's support. The data analysis technique used was product moment correlation from Karl Pearson. Based on the results of the analysis a correlation coefficient (R) was obtained of 0.512 with  $p = 0.000$  ( $p < 0.050$ ) and the results of the data analysis also showed a coefficient of determination (R<sup>2</sup>) of 0.262 which indicated that the husband's social support variable contributed 26.2% to marital satisfaction. These results indicate that there is a positive relationship between marital satisfaction and husband's support for female nurses who are married and live in West Jakarta.*
