ABSTRACT

Since the pandemic of Covid-19 attack Indonesia in 2020, the government set new rule to study and work from home based on the spread letter of education ministry no. 30/SE/2020. It use internet to conduct learning activity. This strategy use internet as the tool to access, deliver the materials and do discussion by the internet. This kind of learning activity called as online learning/ E-learning. Online learning provide materials matter and facilitate interaction between teacher to students and fellow students. Online learning also applied for English students' education. In English, there are 2 skills category need to be mastered as like productive skills (Speaking and Writing) and receptive skills (Listening and Reading). Productive skill is a skill produce a language to communicate and express language. It needs a lot of practice to master till students able to use their productive skills maximally in communication. However, online learning need good connectivity, electricity, tools (gadget/computer) and social economy support. It may become a challenge for teacher and students in running the online learning program. This research analysis aim to analyze students' and lecturer readiness on online learning toward students' productive skills.
