

ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara religiusitas dan kecerdasan emosi dengan perilaku agresif pada santri di Pondok Pesantren Ar-Risalah Cijantung IV Ciamis. Populasi dalam penelitian ini adalah santri atau siswa kelas VIII dan kelas IX di Pondok Pesantren Ar-Risalah Cijantung IV Ciamis berjumlah 160 siswa dengan jumlah sampel 113 siswa. Metode pengumpulan data menggunakan skala, ada tiga skala yaitu religiusitas, kecerdasan emosi, dan perilaku agresif. Hasil penelitian dapat disimpulkan: (1) Ada hubungan negatif antara religiusitas dengan perilaku agresif pada santri di pondok pesantren Ar-Risalah Cijantung IV Ciamis, dengan hasil uji korelasi *product moment* sebesar $-0,762$ ($p < 0,05$). Sumbangan efektif religiusitas dengan perilaku agresif adalah 52,83%. (2) Ada hubungan negatif antara kecerdasan emosi dengan perilaku agresif pada santri di pondok pesantren Ar-Risalah Cijantung IV Ciamis, dengan hasil uji korelasi *product moment* sebesar $-0,557$ ($p < 0,05$). Sumbangan efektif kecerdasan emosi dengan perilaku agresif adalah 5,95%. (3) Ada hubungan antara religiusitas dan kecerdasan emosi dengan perilaku agresif pada santri di pondok pesantren Ar-Risalah Cijantung IV Ciamis nilai F hitung sebesar 78,357 ($p < 0,05$). Kontribusi atau sumbangan antara religiusitas dan kecerdasan emosi dengan perilaku agresif pada santri di pondok pesantren Ar-Risalah Cijantung IV Ciamis sebesar 58,8%.

Kata kunci: Religiusitas, Kecerdasan Emosi, Perilaku agresif

ABSTRACT

This research aims to find out the relationship between religiosity and emotional intelligence toward aggressive behavior of junior high school santri (student at traditional Muslim school) in Ar-Risalah Cijantung IV Islamic boarding school, Ciamis. The Population in this research is 160 santri or students of class VII and IX in Ar-Risalah Cijantung IV Islamic boarding school, Ciamis with a total of 113 students as the sample. Method of data collection used three scales; scale of religiosity, emotional intelligence, and aggressive behavior. It can be concluded: (1) There is a significant negative relationship between religiosity and aggressive behavior in junior high school students with product moment correlation test of -0.762 ($p < 0,05$). The effective contribution of religiosity to aggressive behavior is 52.83%. (2) There is a significant negative relationship between emotional intelligence and aggressive behavior in junior high school students with product moment correlation test result -0.557 ($p < 0.05$). The effective contribution of emotional intelligence to aggressive behavior is 5,95%. (3) There is a relationship between religiosity and emotional intelligence toward aggressive behavior in junior high school students with F-count value of 78,357 ($p < 0.05$). The contribution of religiosity and emotional intelligence on aggressive behavior in junior high school students is 58,8%.
