ABSTRACT

This study aims to examine the effect of EPS, ROE, and DER on Share Prices, both simultaneously and partially, on companies in the LQ 45 group 2015-2017. The research sampling technique was chosen by purposive sampling from 53 companies in the LQ 45 Index group and 28 companies that became the study sample. Data analysis technique used is multiple linear regression. The results showed that simultaneous EPS, ROE, and DER had an effect on stock prices in the LQ 45 Index group in 2015-2017, and in the case of ESP, ROE, and DER had a significant positive effect on stock prices.
