ABSTRACT

Good Corporate Governance (GCG) is the rules, standards and organizations in the economic field related to company regulations, directors and managers as well as the breakdown and elaboration of duties and authorities as well as accountability to investors (shareholders and creditors). This study aims to analyze the influence of the Independent Board of Commissioners, the Audit Committee and the Board of Directors on the financial performance of the coal mining company. Later the results of this study are expected to provide input on the issue of the mechanism of Good Corporate Governance (GCG) that affects the company's financial performance, especially in coal mining companies. Testing the hypothesis in this study using multiple linear regression analysis. The population in this study is the financial statements of coal mining companies listed on the Indonesia Stock Exchange in 2016-2018. And for the sample obtained 17 coal mining companies. Based on the results of the study note that the Independent Board of Commissioners influences the company's financial performance, the Audit Committee does not affect the company's financial performance, the Board of Directors does not affect the company's financial performance, and the Independent Board of Commissioners, the Audit Committee and the Board of Directors together do not affect the financial performance of the company.

Keywords: Good Corporate Governance, corporate financial performance
