Harga saham adalah indikator nilai perusahaan, jadi penting untuk membuat harga saham terus naik dari waktu ke waktu. Laporan keuangan dilihat investor sebagai pertimbangan sebelum mereka menanamkan sahamnya. Penelitian ini bertujuan untuk menguji pengaruh laba bersih, arus kas operasional, arus kas investasi, arus kas pendanaan dan *Debt to Equity Ratio* terhadap harga saham. Data penelitian ini terdiri dari laporan keuangan perusahaan Manufaktur sektor Industri Dasar dan Kimia. Metode yang digunakan untuk menguji hipotesis adalah analisis regresi berganda. Hasil penelitian menunjukkan bahwa secara simultan laba bersih, arus kas operasional, arus kas investasi, arus kas pendanaan dan *Debt to Equity Ratio* berpengaruh terhadap harga saham dan secara parsial arus kas investasi dan *Debt to Equity Ratio* tidak berpengaruh terhadap harga saham sedangkan laba bersih, arus kas operasional dan arus kas pendanaan berpengaruh terhadap harga saham.

The stock price is an indicator of the value of the company, so it's important to make the stock price continue to rise from time to time. The financial statements are seen by investors as a consideration before they invest their shares. This study aims to examine the effect of net income, operational cash flow, investment cash flow, funding cash flow and Debt to Equity Ratio on stock prices. The data of this study consisted of the financial statements of Manufacturing companies in the Basic Industry and Chemical sectors. The method used to test the hypothesis is multiple regression analysis. The results showed that simultaneous net income, operating cash flow, investment cash flow, funding cash flow and Debt to Equity Ratio affect stock prices and partially investment cash flow and Debt to Equity Ratio do not affect the stock price while net income, flows Operating cash and funding cash flows affect stock prices.

Keywords: *net income, cash flow component, Debt to equity ratio and stock prices*
