**ABSTRAK**

This study aims to analyze the financial performance of PT Mayora Indah Tbk during the 2017-2019 period. This research is a quantitative research with a descriptive design. The data used is secondary data obtained through the <https://www.idx.co.id> site. Namely by calculating the liquidity ratios, profitability, activity, and leverage of PT Mayora Indah Tbk. The results of the analysis show that the company's liquidity ratio, whether seen from the current ratio, quick ratio and cash ratio, shows that companies have a level of liquidity that tends to increase above the average industry standard. Judging from the activity ratio seen from the Receivable Turnover, Inventory Turnover, Fixed Asset Turnover, and Total Asset Turnover of PT Mayora Indah Tbk. can be said to be unhealthy because the activity level tends to decrease and is below the average industry standard. Judging from the profitability ratio Gross profit margin, Net profit margin, Return on investment, Return on Assets, and Return equity of PT Mayora Indah Tbk. It can be said that it is not healthy because the level of profitability tends to be below the average industry standard. Judging from the leverage ratio Debt to Asset ratio and Debt to equity ratio, PT Mayora Indah Tbk is said to be very healthy because it is above the average industry standard. The company experienced an increase in accounts receivable.

Key words: Liquidity Ratio, Activity Ratio, Leverage Ratio, Profitability Ratio, and Financial Performance
