SYNOPSIS

The Indonesian Association of Food Technologists (IAFT/ PATPI) published a new book as a collection of essays written by members of IAFT come from around Indonesia. Different from the previous books published by IAFT that written in the Indonesian language, the present book was written in English so that this book can be understood and beneficial to the readers from FIFSTA and other countries in the world. Publishing English-language books are the target of IAFT, considering that this professional organization needs to expose the idea, thinking, and concept of its members globally. This book contains five parts, namely Food Security and Safety, New Technology, Functional Foods, Ingredients, and Nutrition, and the last part is about the Specific Issues. A total of 33 authors have contributed their articles to this book with a total number of 35 articles. The contribution of the writers' ideas is very useful for information about the status of food in Indonesia to the wider community. May this book be useful as a reference in preparing policy related the food development, especially in Indonesia, and may give inspiration for further research and development related to food science and technology.
