

## ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara reputasi perusahaan dengan *work engagement* pada karyawan generasi milenial di *coffeeshop* Kota Yogyakarta. Hipotesis penelitian adalah terdapat hubungan positif antara reputasi perusahaan dengan *work engagement* pada karyawan generasi milenial di *coffeeshop* Kota Yogyakarta. Subjek dalam penelitian berjumlah 62 responden yang merupakan barista di *coffeeshop* Kota Yogyakarta yang bekerja selama lebih dari 1 tahun. Teknik pengambilan sampel yang digunakan adalah metode *purposive sampling* dengan menggunakan *Skala Likert* yaitu skala reputasi perusahaan dan skala *work engagement*. Data yang telah diperoleh dianalisis menggunakan uji korelasi *product moment*. Berdasarkan hasil analisis data diperoleh koefisien korelasi (R) sebesar 0,535 dengan  $p = 0,000$  ( $p < 0,050$ ). Hasil penelitian menunjukkan bahwa terdapat hubungan positif antara reputasi perusahaan dengan *work engagement*. Diterimanya hipotesis penelitian menunjukkan bahwa koefisien koefisien determinasi ( $R^2$ ) sebesar 0,287 pada variabel reputasi perusahaan menunjukkan kontribusi 28,7% terhadap *work engagement*.

**Kata kunci** : reputasi perusahaan, *work engagement*, milenial, *coffee shop*

## ABSTRACT

*This study aims to determine the relationship between company reputation and work engagement for millennial employees at a coffee shop in Yogyakarta City. The research hypothesis is that there is a positive relationship between company reputation and work engagement for millennial generation employees at coffee shops in Yogyakarta City. Subjects in the study found 62 respondents who are baristas in a coffee shop in the city of Yogyakarta who has worked for more than 1 year. The sampling technique used is the purposive sampling method using a Likert scale, namely the company reputation scale and work engagement scale. The data obtained were analyzed using the product-moment correlation test. Results Based on the analysis data obtained a correlation coefficient (R) of 0.535 with  $p = 0.000$  ( $p < 0.050$ ). The results showed that there was a positive relationship between company reputation and job involvement. The acceptance of the research hypothesis shows that the coefficient of determination (R<sup>2</sup>) of 0.287 on the company reputation variable shows a 28.7% contribution to work involvement.*
