INTISARI*

Kecamatan Tamansari merupakan kecamatan yang memiliki populasi ternak sapi perah yang cukup banyak dibandingkan dengan kecamatan-kecamatan yang berbeda wilayah di Kabupaten Boyolali. Penelitian ini bertujuan untuk mengetahui bagaimana kontribusi usaha sapi perah dan seberapa besar kontribusi usaha peternakan sapi perah terhadap pendapatan keluarga di kecamatan tamansari kabupaten boyolali. Penelitian ini dilaksanakan pada bulan Mei 2023. Penelitian dilakukan di Kecamatan Tamansari, Kabupaten Boyolali. Metode penelitian ini merupakan metode studi kasus. Penentuan sampel untuk pengambilan data dilakukan secara *proportional random sampling* berdasarkan pembagian setiap wilayah dari Kecamatan Tamansari. Analisis data menggunakan analisis deskriptif dan menggunakan rumus kontribusi pendapatan serta analisis *correlation pearson*. Berdasarkan hasil penelitian kontribusi usaha ternak sapi perah terhadap pendapatan keluarga di Kecamatan Tamansari Kabupaten Boyolali dapat disimpulkan sebagai berikut 1) Nilai kontribusi pendapatan usaha ternak sapi perah di Kecamatan Tamansari Kabupaten Boyolali yaitu 45% (lebih dari 30%), maka usaha ternak sapi perah termasuk dalam kategori usaha utama. 2) Jumlah kepemilikan ternak sapi perah terhadap pendapatan berhubungan secara negatif yaitu -0,132 berarti memiliki hubungan rendah dan tidak searah, dikarenakan ternak sapi perah yang dipelihara responden banyak yang masih muda dan belum bereproduksi (laktasi). 3) Jumlah kepemilikan ternak sapi perah dengan presentase kontribusi pendapatan usaha ternak sapi perah memiliki nilai positif 0,959 berarti memiliki tingkat hubungan tinggi.

Kata Kunci : Kontribusi Usaha Sapi Perah, Pendapatan Keluarga, Kecamatan Tamansari

ABSTRACT^{*)}

Tamansari sub-district is a sub-district that has a large population of dairy cattle compared to other sub-districts in Boyolali district. This study aims to find out how the dairy business contributes and how much the dairy farm business contributes to family income in Tamansari sub-district, Boyolali district. This research was conducted in May 2023. The research was conducted in Tamansari District, Boyolali Regency. This research method is a case study method. Determination of the sample for data collection was carried out by means of proportional random sampling based on the division of each region of Tamansari District. Data analysis used descriptive analysis and used the income contribution formula and Pearson correlation analysis. Based on the research results of the contribution of the dairy cattle business to family income in Tamansari District, Boyolali Regency, it can be concluded as follows 1) The contribution value of the dairy cattle business income in Tamansari District, Boyolali Regency, is 45% (more than 30%), so that the dairy cattle business is included in the main business category. 2) The number of dairy cattle ownership has a negative relationship to income, i.e. -0.132, which means it has a low and not unidirectional relationship, because many of the dairy cattle kept by the respondents are young and have not reproduced (lactation). 3) The total ownership of dairy cattle with the percentage contribution of dairy cattle business income has a positive value of 0.959 which means it has a high degree of relationship.

Keywords: Contribution of Dairy Cattle Business, Family Income, Tamansari District
