"ECONOMIC AND ENVIRON MENTAL BENEFITS OF SUSTAINABLE MATERIAL S ADOPTION IN AUTOMO TIVE MANUFACTURING"

Abstract

The automotive industry is undergoing a major transformation towards sustainability, driven by both economic and environmental concerns. Traditional manufacturing processes rely heavily on non-renewable resources like steel and plastics, contributing to environmental degradation and greenhouse gas emissions. However, with increasing regulatory pressures and consumer demand for eco-friendly products, automakers are adopting sustainable materials such as bio-based plastics, recycled metals, and natural fibers. These materials offer environmental benefits by reducing carbon emissions, conserving resources, and minimizing waste, while also providing economic advantages such as improved fuel efficiency, lower production costs, and reduced dependency on volatile resource markets. Integrating sustainable materials often requires changes in production processes, including retooling and new technologies, but these adjustments lead to long-term benefits, such as lighter vehicles, lower energy consumption, and enhanced recyclability. Additionally, innovations like 3D printing have facilitated the use of these materials, allowing for more efficient production with less waste. A lifecycle analysis approach reveals that sustainable materials can significantly reduce environmental impact throughout a vehicle's life, from production to disposal. This shift has also opened up new market opportunities, as consumers increasingly favor vehicles that align with their environmental values. Overall, by adopting sustainable practices, the automotive industry can address both economic and ecological priorities, positioning itself for future growth while leading the way in demonstrating how sustainability can drive innovation.

Asep Rokhyadi Permana Saputra:

I believe that you would serve as an excellent reviewer of the manuscript, "ECONOMIC AND ENVIRON MENTAL BENEFITS OF SUSTAINABLE MATERIAL S ADOPTION IN AUTOMO TIVE MANUFACTURING," which has been submitted to Journal of process management and new technologies. The submission's abstract is inserted below, and I hope that you will consider undertaking this important task for us.

Please log into the journal web site by 2024/11/26 to indicate whether you will undertake the review or not, as well as to access the submission and to record your review and recommendation. The web site is <https://aseestant.ceon.rs/index.php/jouproman>

The review itself is due 2024/12/3.

If you do not have your username and password for the journal's web site, you can use this link to reset your password (which will then be emailed to you along with your username). <https://aseestant.ceon.rs/index.php/jouproman/login/lostPassword>

Submission URL: <https://aseestant.ceon.rs/index.php/jouproman/workflow/index/54386/3>

Thank you for considering this request.

Gabrijela Popović

Ira Septi Ayu Saputri, Asep Rokhyadi Permana Saputra, Djaelani Djaelani:

It is my pleasure to inform you that your paper entitled THE INFLUENCE OF GREEN COMPENSATION, GREEN APPRAISAL, AND GREEN SATISFACTION ON EMPLOYEE PERFORMANCE IN CONSTRUCTION COMPANIES is accepted for publication in our journal Journal of process management and new technologies. To prepare the final author version of the paper it is necessary:

Fill out the author statement form available at our website. Also, revise the paper accordingly with the comments of the reviewers below.

Reviewer\_1

Good piece of paper.

Integrate into the manuscript flow chart of your research.

Also, fully adjust the paper within the template of the journal

Reviewer\_2

Paper is not in journal template. Fully adjust the paper into the journals template. Template is available at <https://japmnt.com/submissions-and-instructions-for-authors/>

Some relevant references should be cited:
